

Lei Le

CONTACT INFORMATION	Amazon Amelia Building 501 Fairview Ave N Seattle, WA 98109	http://leile26.github.io lelei1988@gmail.com
RESEARCH INTERESTS	Machine Learning and Artificial Intelligence . Representation Learning , particularly tractable regularized dictionary learning; Optimization , particularly non-convex optimization over matrix factorization; Reinforcement Learning , particularly sparse coding for states and policy learning for continuous actions.	
EDUCATION	Indiana University , Bloomington, IN, United States Ph.D, Computer Science, Aug 2013 to Jun 2019 <ul style="list-style-type: none">• Advisor: Martha White, Ph.D• Ph.D minors: Statistical Sciences Tongji University , Shanghai, China Master of Management Science, Information Management and Information System, Sep 2010 to Mar 2013 East China Normal University , Shanghai, China Bachelor of Management Science, Information Management and Information System, Sep 2006 to Jun 2010	
WORK EXPERIENCE	Applied Scientist in Machine Learning Amazon , Seattle Buyer Fraud Prevention Team Software Engineering Intern for PhD Google , New York City Office Research and Machine Intelligence Group	Aug 2019 to Present Sep 2018 to Dec 2018
RESEARCH EXPERIENCE	Research Assistant Department of Computer Science, Indiana University Bloomington Supervisor: Martha White, Ph.D	Aug 2015 to May 2019
TEACHING EXPERIENCE	Associate Instructor CSCI-B554: Probabilistic Approaches to Artificial Intelligence at Indiana University Bloomington Associate Instructor CSCI-B561: Advanced Database Concepts at Indiana University Bloomington Associate Instructor CSCI-A110: Introduction to Computers and Computing at Indiana University Bloomington	Spring 2015 Fall 2014 Spring 2014 & Fall 2013
MANUSCRIPTS	<ol style="list-style-type: none">1. Lei Le, Ajin Joseph and Martha White. Characterizing optimality of full-rank stationary points for matrix factorization objectives.2. Lei Le and Martha White. Identifying global optimality for dictionary learning.	

PUBLICATIONS

1. Farzane Aminmansour, Andrew Patterson, **Lei Le**, Yisu Peng, Daniel Mitchell, Franco Pestilli, Cesar Caiafa, Russell Greiner and Martha White. Learning Macroscopic Brain Connectomes via Group-Sparse Factorization. (Accepted by NeurIPS 2019)
2. Vincent Liu, Raksha Kumaraswam, **Lei Le**, and Martha White. The utility of sparse representations for control in reinforcement learning. (Accepted by AAAI 2019)
3. **Lei Le**, Andrew Patterson, and Martha White. Supervised autoencoders: Improving generalization performance with unsupervised regularizers. Advances in Neural Information Processing Systems (NeurIPS), pages 107-117, 2018
4. **Lei Le**, Raksha Kumaraswamy, and Martha White. Learning sparse representations in reinforcement learning with sparse coding. In Proceedings of the Twenty-Sixth International Joint Conference on Artificial Intelligence, IJCAI-17, pages 2067–2073, 2017
5. **Lei Le**, Emilio Ferrara, and Alessandro Flammini. On predictability of rare events leveraging social media: A machine learning perspective. In Proceedings of the 3rd ACM Conference on Online Social Networks (COSN’15), Palo Alto, CA, USA, November 2015.

PRESENTATIONS

1. Learning sparse representations for reinforcement learning. AI seminar at University of Alberta, March 29, 2018

SERVICES

Reviewer for AAAI, ICML, NeurIPS
